CONTRIBUTORS

freemant^{technology}

a  micromeritics® company

Freeman Technology, a Micromeritics company, specializes in systems for measuring the flow properties of powders and has over 15 years' experience in powder flow and powder characterization.

The company invests significantly in R&D and applications development, and provides comprehensive support alongside its range of products. Expert teams guide and support users around the world in addressing their individual powder challenges, focusing on delivering the most relevant information for the process.

The result is world-leading solutions that underpin process and product understanding, accelerate R&D and formulation towards successful commercialization, and support the long term optimization of powder processes.

Evonik is one of the world's leading speciality chemicals companies.

We don't produce car tires, mattresses, tablets, or animal feed. However, these end products contain Evonik products – like 4,000 others, too. Often, it's just a small amount that we contribute but that's exactly what makes the difference. This is how Evonik makes tires more fuel-efficient, mattresses bouncier, tablets more effective, and animal nutrition healthier. That's speciality chemicals. And we are one of the best in the world.

Evonik stands for appealing business and innovative strength. We work in a results-focused corporate culture that is geared to profitable growth and increasing the value of the company. In more than 100 countries, we benefit from our proximity to customers, and our leading market positions. More than 36,000 employees are bound by a claim: No product is so perfect that it couldn't be made better.
